

What is NFTrust?

NFTrust is a limited partnership that offers private and institutional investors the opportunity to invest in a new asset class - in the form of shares. We have a deep understanding of the mechanisms of blockchain technologies and invest in various Non-Fungible Tokens (NFT) and blockchain VC investments, with a lot of know-how, an extensive network and some old Hamburg merchant traditions.

In the form of shares, we allow investors to enter this new and complex market; otherwise, only available with a lot of time-consuming research, great effort, and technical skills. You invest in us through shares and thereby become a diversified NFT portfolio shareholder.

Our Mission

We are at the beginning of a new era of blockchain technologies. Our mission is to simplify investing in crypto assets like NFTs. NFTrust provides traditional investors with a convenient solution to get exposure in the NFT market via our shares.

Investment

On December 21st, 2022, our shareholders decided that we offer up to 3 million shares to the market and issue them for EUR 1.00. Our new shares can be subscribed to during Q1 2023. We also focus on a stock exchange listing in 2024 so that the shares, at that time, are liquid and tradable.
